mConfirm
Streamlines your self-service procurement

SAP® Certified
Mobile App

## Real Time Updates of Inbound Inventory Items

In busy receiving operations, workers often must choose between following established procedures or getting the job done. Too often, corners get cut and paperwork get errors. As a result, enterprises have to deal with inaccurate inventory records or delayed accurate inventory information. Innovapptive's mConfirm mobile app allows for easy processing of inbound inventory items and provides enterprises and inventory managers real-time visibility into inventory levels and eliminates human errors.

Eliminate Blocked Invoices In Self-Service Procurement

For non-inventory expense items, such as office supplies or office furniture, several enterprises have adopted a self-service procurement model to create and manage their requisitions. Self-service procurement relieves enterprises' purchasing department of a huge administrative burden, but an untimely entry of a goods receipt or service entry sheet , offsets these benefits and transfers the burden to your accounts payable department. Innovapptive's mConfirm mobile app eliminates your GR/IR reconciliation headaches and allows requesters to create a goods receipt or a service entry sheet with a few clicks. The mobile app sends out proactive blocked invoice push notifications to drive requesters to create the receipt.

Automate SAP Service Procurement with Mobile OCR

SAP service procurement mandates a service based invoice, which means, a requester /plant contact must enter a service entry sheet, before an invoice receipt. However, more often than not, requesters don't enter the service entry sheet in a timely manner and requires accounts payable to manually chase concerned employees. The mConfirm mobile app comes pre-packaged with an SAP certified add-on for accounts payable to upload service purchase order invoice images and then route it to a requester for resolution. Requester receives these invoices through push notifications and click on the OCR function to retrieve the lines items from the PO or from the invoice itself. (For unplanned service line items)

> "mConfirm mobile app from Innovapptive streamlines your self-service procurement. The mobile app sends out blocked invoice push notifications to pro-actively drive your workforce to enter a goods receipt of a service entry sheet in a timely manner."

Go Mobile in less than 4 weeks

Jump start your mobile journey in less than 4 weeks. Innovapptive offers a SAP certified rapid deployment solution (RDS) for the mWorklist mobile app.
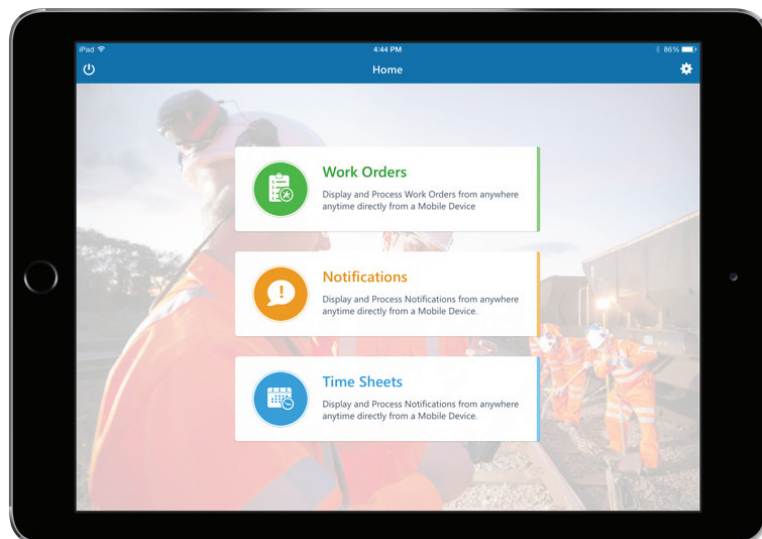

Our Unique Value Proposition

Our Mobile Portfolio, innovative Rapid App Configurator Engine (RACE) powered by the SAP HANA Cloud Platform with embedded licenses allow our customers to accelerate and execute their SAP Enterprise mobile strategy, while benefiting from a compelling ROI.

Solution Business Benefits and Value Drivers

Value Drivers

- Receive and update work orders.
- Get directions with GIS and GPS.
- View installed-base listings and access equipment, details, dependencies, and maintenance history.
- View interactive part schematics (with the SAP Visual Enterprise Viewer mobile app).
- Follow guided workflows, steps, and instructions.

- Install and geotag equipment.
- Perform maintenance, inspections, and repairs.
- Track and automatically report status, progress, and location.
- Capture readings, measurements, and photos.
- Record problems, actions, time, parts, and materials.
- Create work orders and notifications on the spot.

Business Benefits

- Extend and improve asset life and reliability.
- Increase plant, fleet, and equipment performance.
- Improve workforce safety and productivity.
- Reduce accidents, failures, and outages.
- Reduce unplanned downtime and maintenance backlog.
- Improve first-time resolution ratesIncreased efficiency of

> "Mobile is an essential element to executing on a Reliability Centered Maintenance (RCM) program where you can save 30-50% annually."

Solution Environment

- SUP 2.2, 2. 3 and SMP 3.0
- SAP NetWeaver Gateway 7.3 & 7.4
- SAP ECC 6.0, EHP any version.
- iPhone 4.0 or higher & iOS 6.0 and above.
- Android Smartphones & Tablets
