# Rapid Deployment Solutions

FOR **SAP Mobile Platform**

Why SAP Qualified Rapid Deployment Solutions?

Current industry trends suggest that mobile technologies are set to disrupt the business environment in which we live and SAP Mobile Platform is likely to be at the centre of this for SAP customers.

The SAP Qualified Rapid Deployment Solution from Innovapptive enables the implementation of SAP Mobile Platform and **NetWeaver Gateway** for full productive purposes in a fixed time and fixed price. The solution leverages SAP mobile best practices and ensures the most predictable and fastest time to execute on your mobile strategy.

Solution Highlights

- Full implementation and configuration of the required platform components (SAP Mobile Platform, NetWeaver Gateway) including high availability, security and push.
- Full development environment set up for all the supported development scenarios
- Integration to the various back end systems
- Sample apps to introduce how to setup and verify the development environment
- Supported devices: iOS, Android and Blackberry

Option 1 Evaluation	Option 2 Development	Option 3 Production SMALL	Option 4 Production LARGE
1 Week	4 Weeks	6 Weeks	9 Weeks

Flexible Deployment Options

Discover the Potential of Mobile

Innovapptive has pioneered agile and scalable approaches to SAP Mobility using a phased approach with rapid iterative cycles allowing for swift 30 to 60 day deployment and immediate hands-on experiences for the customer. We have applied these approaches to helping organizations identify the potential for Mobility by rapid development of our pre-packaged solutions. This makes it possible to look into what can be achieved with the SAP Mobile Platform – considering what the relevant business scenarios might be and to find a suitable model to create proof points within SAP Mobile Platform.

Scope of the SAP Mobile Platform RDS

- Installation of Sybase Unwired Platform (SUP), Relay Server and SAP NetWeaver Gateway
- Integration of SUP and NW GW to SAP Business Suite application (ERP, SRM, CRM)
- Configuration of Security and Push Enablement Configuration
- Assistance to set up High Availability
- Testing with the use of 3 SAP supplied Mobile Apps: Native, Hybrid and Odata
- Post Go-Live Support

Key Business Benefits

- Collaboratively discover how SAP Mobile Platform and Apps can influence your business and where a business case and ROI can be found.
- See the power of a Mobile Solution with your own data in weeks instead of months.
- Reduce the implementation risk of going ahead with a purchase of SAP Mobile Platform.
- Understand when implementing mobility is right for your organization.
- Build a business case for SAP Mobility based upon facts.

START
- Project management   • Kick-off workshop   • Infrastructure Prep

DEPLOY
