mQuality
Mobile Quality Notifications

SAP® Certified
Mobile App

Stay Ahead of Competition With Real-Time Quality Control and Assurance

Quality managers/inspectors and operators are challenged with manual processes to capture accurate inspection lot quality issues. Quality managers on the shop floor experience a tremendous loss of productivity due to redundant quality related data entry and image capturing process to create an SAP quality notification for an inspection lot. mQuality mobile app from Innovapptive transforms your quality control and assurance process by

Improve Product Quality and Customer Satisfaction

Innovapptive's mQuality mobile app allows quality managers to create SAP quality notifications in real-time by capturing the product defect details and images using their mobile device. The mobile app allows you to create the SAP quality notification with reference to an SAP document, which can then be assigned to a coordinator for faster processing of the defect resolution to improve product quality and

Our Unique Value Proposition

Our Mobile Portfolio, innovative Rapid App Configurator Engine (RACE) powered by the SAP HANA Cloud Platform with embedded licenses allow our customers to accelerate and execute their SAP Enterprise mobile strategy, while benefiting from a compelling ROI.

Go Mobile in less than 4 weeks

Jump start your mobile journey in less than 4 weeks. Innovapptive offers a SAP certified rapid deployment solution (RDS) for the mWorklist mobile app.

mQuality mobile app accelerates the inspection and SAP processes up to 50%. It provides automation within SAP QM and reduces SAP quality notification and inspection costs by approximately $750,000. The mobile app assists in ISO, GMP, and legal compliance efforts.

Comprehensive Problem Handling for All Types of Complaints

Product defects arising from a customer, vendor or internal production problems can be captured real-time on the shop floor or at the warehouse against a goods movement. mQuality mobile app enables shop floor managers, operators, quality managers and Inspectors to efficiently manage and assure product quality, monitor and improve quality standards and document quality compliance, for subsequent audit.

Comply With Ease - Legal and Regulatory Requirements

SAP offers a powerful quality management solution as integral part of mySAP ERP, however, the user interface and lack of mobility to record in-process quality data is not suitable for operators or quality inspectors in the shop floor. mQuality mobile app enables monitoring of critical product and process characteristics and allows instantaneous intervention, by empowering your quality managers/inspectors the ability to create an SAP Quality Notification which assists in ISO, GMP, legal

mQuality Mobile App documentation and audit trails enable rapid root-cause analysis to minimize cost of compliance and recalls

Drive Decision Making To Shop Floor and Promote Effective Collaboration

mQuality mobile app provides a closed feedback loop communication between the quality inspector, coordinator and the assignee (Engineer). The mobile app provides the following key features to promote effective collaboration to create SAP quality notifications for:

- Customer Complaints
- Vendor Complaints
- Internal Production Complaints
- Referencing relevant SAP Transactions.

- Enter short and detailed description
- Assign to a coordinator or engineer
- Select a defect priority
- Select required start and end dates
- Capture product defect images
- Capture geo-location

mQuality mobile app quality improves companies' company-specific development processes. The associated workflow functions and effective collaboration enables companies to efficiently solve problems that arise in the development phase.

mQuality Business Benefits

- **Consistent and transparent data** – company-wide; easy communication of quality information across company boundaries.
- Documents product quality to **achieve regulatory compliance.**
- **Higher quality performance**, while lowering cost-of-quality delivery.
- **Efficient processing of quality issues** using workflows.
- **Higher product quality** and customer satisfaction.
- Superior, cost-effective **quality compliance.**
- Continuous **quality improvement.**

Value Drivers

- Drive SAP Quality Notification capture at the **point of identifying the defect.**
- Comprehensive problem handling for **all types of complaints.**
