

SAP® Certified
Mobile App

Streamline and Accelerate your Procurement Process

The PO or PR release strategy plays an important role in controlling budgets, to avoid unnecessary spend and provide optimization of stock levels. The multi-level PO and PR release strategy provides a foolproof control mechanism to achieve this. On the other side of the coin, as the numbers for the release of Purchase Orders or Requisitions increases, the overall time required for releasing them also substantially increases. The need to travel, meet vendors, look at the various product options, attend trade fairs, understand alternative technologies and remain abreast of governmental compliances keeps purchase professionals offline from their ERP systems. The need for a handy mobile application which enable purchase professionals and makes PO or PR release process fast and effective, is ever increasing.

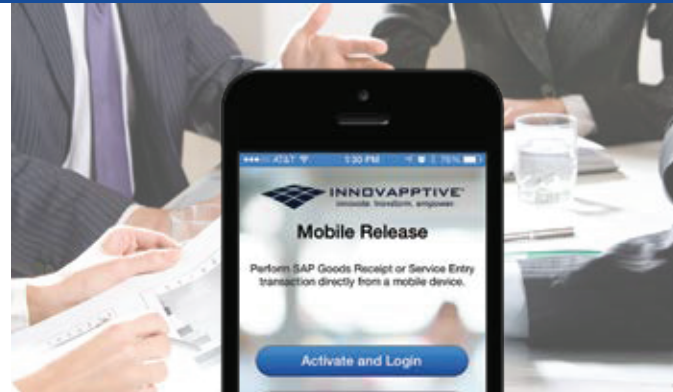

The Innovapptive - SAP Certified mRelease Solution is a ready-to-run application that integrates your back-end SAP systems with your field across multiple channels. The solution leverages native capabilities of smartphones to resolve critical business pain points and eliminates the inefficiency in the procurement process allowing employees to release and approve PO's and PR's anywhere and anytime.

Instant purchasing decisions

Managers and buyers are able to make purchasing decisions on the spot, without requiring access to a computer. They no longer need to spend time on purchase order or requisition approval and instead can get on with running the business.

Low initial & ongoing costs

The mRelease mobile app has low initial and ongoing costs especially when compared to other purchase order or requisition approval mobility products, allowing customers to realize ROI much sooner. It increases efficiencies for purchasing staff, which can have a flow on effect all the way down the supply chain. Goods and services can be procured faster so projects can be completed sooner.

"This is a light-weight, simple to use tool that will help many SAP customers streamline processes and save time. It's cheap to run, easy to implement and provides a fast and efficient user interface for mobile devices with screens of almost any size"

Go Mobile in less than 4 weeks

Jump start your mobile journey in less than 4 weeks. Innovapptive offers a SAP certified rapid deployment solution (RDS) for the mWorklist mobile app.

Our Unique Value Proposition

Our Mobile Portfolio, innovative Rapid App Configurator Engine (RACE) powered by the SAP HANA Cloud Platform with embedded licenses allow our customers to accelerate and execute their SAP Enterprise mobile strategy, while benefiting from a compelling ROI.
