

SAP® Certified
Mobile App

Improve Assets and Meter Reading Rounds Efficiency

Condition monitoring of equipment and assets is critical to ensure the detection and prevention of equipment and asset failures and to prevent unplanned downtime. Operators have the best opportunity to collect the data needed to assess the current condition of the equipment. Innovapptive's mRounds Mobile App, powered by SAP® allows you to record critical asset performance data points in real-time without the use of manual paper forms. Assets that are trending towards failure are identified quickly, allowing you to reduce downtime and better maintain your equipment.

Integrate the Field With Back-Office Systems

Tightly integrate your field and back-office systems by empowering field service technicians to input data directly into mobile devices. Technicians no longer have to retype the information they gather on rounds and service calls. Innovapptive's mRounds Mobile App collects notes and results directly to multiple backend systems, reducing errors, saving time, and eliminating busywork.

Reduce Maintenance Downtime

Preventive maintenance can help enterprises save thousands of dollars a year and avoid disruption to their production and equipment downtime. By recording data at the point of collection in real-time, Innovapptive's mRounds Mobile app mitigates the consequences of equipment failure, by preventing failure before it actually occurs. In addition, the data analysis, trending and alerts module alerts operators and supervisors about equipment conditions, before it completely fails.

Go Mobile in less than 4 weeks

Jump start your mobile journey in less than 4 weeks. Innovapptive offers a SAP Qualified rapid deployment solution (RDS) for the mAssetTag mobile solution.

“Traditional maintenance costs (i.e. labor and material) in the U. S. have escalated at a tremendous rate over the past 10 years. In 1981, domestic plants spent more than \$600 Billion to maintain their critical plant systems. By 1991, the costs had increased to more than \$800 Billion and topped \$1.2 Trillion in 2000. These evaluations indicate that between one third and one half of these maintenance dollars are wasted through ineffective maintenance management methods.”

Our Unique Value Proposition

Our Mobile Portfolio, innovative Rapid App Configurator Engine (RACE) powered by the SAP HANA Cloud Platform with embedded licenses allow our customers to accelerate and execute their SAP Enterprise mobile strategy, while benefiting from a compelling ROI.

Solution Business Benefits and Value Drivers

Value Drivers

- Enter measurement readings on their mobile device and synchronize automatically with backend SAP EAM
- Compare input with historic standards and safe ranges
- Generate notifications on-the-spot
- Trend readings, points, and sequences to avoid emergencies and outages
- Download measurement reading lists by equipment type or name
- Automatically calculate readings, limits, alerts, and collection frequencies

Business Benefits

- Extend and improve asset life and reliability
- Improve workforce safety and productivity
- Reduce unplanned downtime and maintenance backlog
- Increase plant, fleet, and equipment performance
- Reduce accidents, failures, and outages
- Improve first-time resolution rates

“Best-in-class companies are over 2.5 times more likely than the industry average to use mobile devices while making their maintenance rounds.”

SAP Mobility – Too Expensive?

Innovapptive offers cost effective SAP Mobile Platform Run-time licenses – 10% of the mobile app license cost to help your enterprise embrace mobility with minimal investment.

Compatible with Appcelerator Titanium Platform

Solution Environment

- R/3 4.7, SAP ECC 6.0, All EHP's & current release
- SUP 2.2, 2. 3 and SMP 3.0
- SAP NetWeaver Gateway 7.3 & 7.4
- SAP ECC 6.0, EHP any version.
- iPad, iPhones 4.0, 4S, 5, 5C, 6.0 & iOS 7.0, 8.0 or current version
- Android Smartphones and Tablets for most recent OS versions
- Windows Smartphones and Tablets for most recent OS versions
- Desktop Support on SAPUI5 and on Standard SAP Fiori Launchpad
- Innovapptive Rapid App Configurator Engine (RACE™) Included to support native app and desktop customizations and configurations

“In a recent Aberdeen Group Analyst Insight report, Asset Management: Using Analytics to Drive Predictive Maintenance, a survey of executives states that the number one risk to operations was failure of their critical physical assets — ensuring that they are available, reliable and performing as originally intended.”

Awards & Recognition

Innovapptive featured among 135 leading enterprise mobile companies within the “Global Strategic Business Report Enterprise Mobility” published

INNOVAPPTIVE
innovate. transform. empower.

Innovapptive is among the fastest-growing enterprise mobile and user experience (UX) solution companies and is an industry leader among rapid mobile application development (RMAD) solution providers. Innovapptive's Rapid App Configurator Engine (RACE) technology redefines traditional approaches to digitize the enterprise and is empowering organizations to rapidly deliver ready-to-run mobile apps across the enterprise. Innovapptive's portfolio of 100+ mobile solutions that run across a wide array of devices and systems is creating a connected enterprise across employees, customers, and suppliers. Innovapptive was named a 2016 SAP Pinnacle Award winner and has won these recognition three years in a row.
